NOTES

This design is not meant to be a 1:1 duplicate of the original SEGA version. Rather, it is a close approximation, designed before I had any direct reference to the original version.

Each panel should be cut from 1/8" transparent acrylic.

This template file is sized for 32x18" sheets, as that was what was available to me at the time.

Note that only two of the four small spacers are actually necessary, and should be glued onto the front face of the front panel. The other two are spares or extra spacers for additional cabinet clearance.
